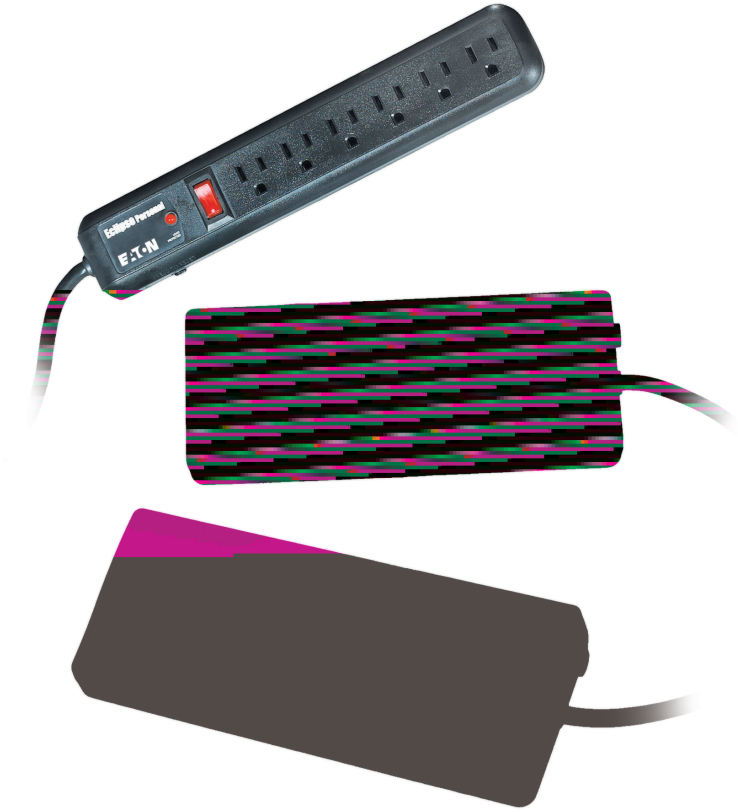
Eaton Eclipse Surge Suppressors



Advanced Features

- Total protection against power surges, spikes, nearby lightning strikes and line noise
- Up to 2160 joule rating
- Master on/off switch
- Instantaneous response time
- Visual alarm(s)
- Adible alarm on Pro models
- Circuit breaker and thermal fuse protection
- 360º rotating plug on Pro models

The Eaton Eclipse product line brings affordable surge protection to your PC, peripherals and other devices in the event of nearby lightning strikes, surges and spikes. In addition, Eclipse provides line noise reduction to minimize interference from the utility power. All Eclipse models include a load protected status LED to notify you in case of surge protection failure. On the EclipsePro and ProTel models, an audible alarm provides warning in combination with the LED.

EclipsePro and ProTel models feature a ground OK LED to warn of building wiring faults which can potentially interfere with Eclipse's ability to arrest surges and spikes.

Eclipse is available in three models for individual applications:

- Eclipse Personal for home appliance or home/office PC use
- EclipsePro and Eclipse ProTel for professional use, including networked PCs, servers and business equipment
- Eclipse ProTel provides a fax/modem protector in addition to all the features of EclipsePro

Eclipse, *your choice of surge suppressor where quality and affordability are a must.*
